### Record keeping

#### 5.8 Version control

##### Scope of policy/procedure/guidelines

Version control is part of the process for managing the drafting and finalisation of documents. It involves including information on the cover pages and in the footers of documents such as dates, version numbers and a list of substantial amendments.

##### Introduction

When drafting a new document (or updating an existing one) version control clearly identifies the development of the document. It allows easy identification, for example, of the first draft which was submitted to a committee for comment; the draft which was generated as a result of those comments; the versions which went back and forward for comment; and then the final version which was agreed and signed off.

##### Applicable Documentation

Version control applies primarily to all policies and procedures produced by St Joseph's Pre School, but is encouraged to be used for other formal documents. However, it will not be included in publicity material.

The first page of this document shows the document control format that must be used. It is recommended that footers of every document for St Joseph's Pre School includes the following information

---

Page (number) of (numbers)
