

Knowledge Organiser Year 5 Geography: Film and Theatre – The Mediterranean

Key Vocabulary Things we already know	
New vocabulary	
climate	Climate is the average measurements of temperature, wind, humidity, snow, and rain in a place over the course of years. Climate is like the weather, but over a long time.
weather	Weather is changes in the atmosphere that occur on a daily basis
Mediterranean Sea	The sea that separates Europe from Africa
UK	England, Scotland, Wales and Northern Ireland make up the UK
physical	features of land that have been impacted by human activity
terrain	how flat/hilly/mountainous the land is

Concept: Physical Geography

Spain

The Mediterranean is in Europe.

The different colours are used to represent the terrain and how hilly/ mountainous it is.

These colours represent how far above sea level it is in that area of land.
