

# St Wilfrid's CE Primary School

## Eco News

Dear Parents and Carers,

At St Wilfrid's, we strive to be eco-friendly in a number different ways through our super keen Eco Warriors and our recycling. However, there is always more we can do and I am delighted to announce two new developments.

### **Solar panels**

West Sussex County Council invited schools to apply to have solar panels installed and we were one of the few schools to receive this award. On Thursday, the installation team will begin the work and they should be up and running by half term. We hope the installation will cause as little disruption as possible but the staff car park will be out of action from Thursday and therefore additional cars will be parked on the road. We are sorry for any inconvenience caused and hope you understand.

### **Plastic Bottle tops**

There is an initiative that recycles the plastic tops of milk bottles and makes a donation to charities. Our local churches are collection points for the charities League of Friends at Princess Royal and Riding for the Disabled. Therefore, we have agreed to support them in this and if you have any milk bottle tops then children can bring them to school from **Monday 11<sup>th</sup> February** to be placed in the collection bin based in the school foyer.

Milk bottle tops must be clean, foil and sticker free, they can be any colour but please do not put any other type of bottle top in, as they are not accepted by the recycling company.

Kind regards,

Simon Hateley  
Head teacher
