

On the menu this term...

The Maya and Space!

Starters

Make a presentation to persuade someone to visit a certain planet! What makes that planet really attractive?

Create your own calendar in the style of the Mayans. What is different about a modern calendar and a Mayan calendar?

Create a Mayan Temple - make it 3D!

How could you add interest for someone who knows nothing about The Maya?

Main Course

Make a model or mobile of the solar system. How could you show the planets are all different sizes and different distances apart? Be prepared to talk about your model and what you have learnt about the solar system.

One of our books this half term is the Firebird.. Create a collage or painting of a mythical bird. What colours would you use? How might you make it 'leap off' of the page?

Design and test a flavoured hot chocolate (the Mayans liked theirs with chili!). What flavours could you try?

Dessert

Make a moon diary! Ask your teacher for the sheet or make your own—what different phases of the moon can you record?

Present a poem to the class about an animal. It can be a poem you have found or one you have written yourself!

Due date:

Week Beginning 1st April 2019
