

# Four Seasons: Knowledge Organiser

## Key Diagrams

## Weather symbols

## Key Facts

The weather changes according to the season

There are four seasons in a year (Spring, Summer, Autumn and Winter)

Weather forecasts predict the weather based on a range of data and seasonal patterns

Clouds are made of tiny droplets of water

Clouds tell us different things about the weather

The water cycle is the way that clouds are formed and how we get rainfall

Know the compass points

Wind blows from different directions, and this causes changes in weather

Know and read weather symbols

In the UK weather differs depending on the region you are in

## Key Vocabulary

thermometer	an instrument for measuring temperature
rainfall gauge	a device for collecting and measuring the amount of rainfall
forecast	a prediction or estimate based on data and trends
cirrus clouds	thin wispy clouds high in the sky formed from ice crystals
cumulus clouds	fluffy clouds that look like cotton wool
nimbus clouds	large grey low level clouds that produce rain
stratus clouds	low clouds that look like a blanket
cumulonimbus clouds	dense tall towers of cloud often come with storms or heavy rain
