

What should I already know?

When we go online we share information.
 I am in control of my personal and private information and decide what I share with others.
 I know who trusted people are and who to talk to if something upsets me.
 I know that people should behave in a respectful responsible manner.

Knowledge

That the internet is used by most people in their everyday lives but there are dangers that we need to know about and understand. It's important to know how to stay safe online.
 We can make sure that we stay safe by keeping our personal information private and only sharing it with trusted people.
 It's important that privacy settings are set on your computers in order to keep personal information safe.
 It's important to keep personal information private so that it can't be used by anyone else.
 We must respect the privacy of others when sharing information. We must not share any information that does not belong to us without the owners permission. By understanding this we will be **responsible digital citizens**.
 Manipulation is where somebody puts you under pressure to do something or behave in a certain way. It is not acceptable to be manipulated or to manipulate someone else. If you feel like you might be being manipulated you should tell a trusted adult.

Values
