

Science - Wednesday 21<sup>st</sup> September

WALT: research and classify the different animal groups.

WALT: understand the difference between vertebrate and invertebrates.

Your science task today is to research the main 5 animal groups and classify them. Is there anything unique to them? What makes them specific to that group?

<https://www.bbc.co.uk/bitesize/topics/zn22pv4/articles/z3nbcwx>

List each group with facts you have found out about them and how we classify those animals.

For example:

1. Mammal - Mammals are different from the other animal groups as they produce milk to give to their young.
