

Science Fair

Tuesday 10th March

School Hall (2.45 – 3.30)

As part of our 2020 Science Week celebrations, we are looking for budding scientists to complete a project to show in our science fair.

Your project could be on anything and presented in any way you like, but must be based around a question which you are trying to find the answer to. You will need to source all of your materials and equipment yourself, so make sure you talk your project through with a parent first and get their permission to take part. If you would like to enter you will need to return the form below to Miss Dover with your idea for your science investigation before the **13th Feb**. Projects should be entered individually with the exception of siblings who may want to complete a joint project. More detailed information regarding the projects will follow on return of slip. Alternatively, you can ask an adult to email the office with your idea and permission if you prefer.

Prizes for the best projects are up for grabs!

Hambrook Science Fair Entry Form

Name/s: _____

Year group/s: _____

What question will your science investigation aim to answer?

Parent/carer signature: _____
