

L/O: To be able to read scales (try to use a decimal point in your answer – e.g. 4.6l)

Reading Scales to Measure in Litres and Millilitres

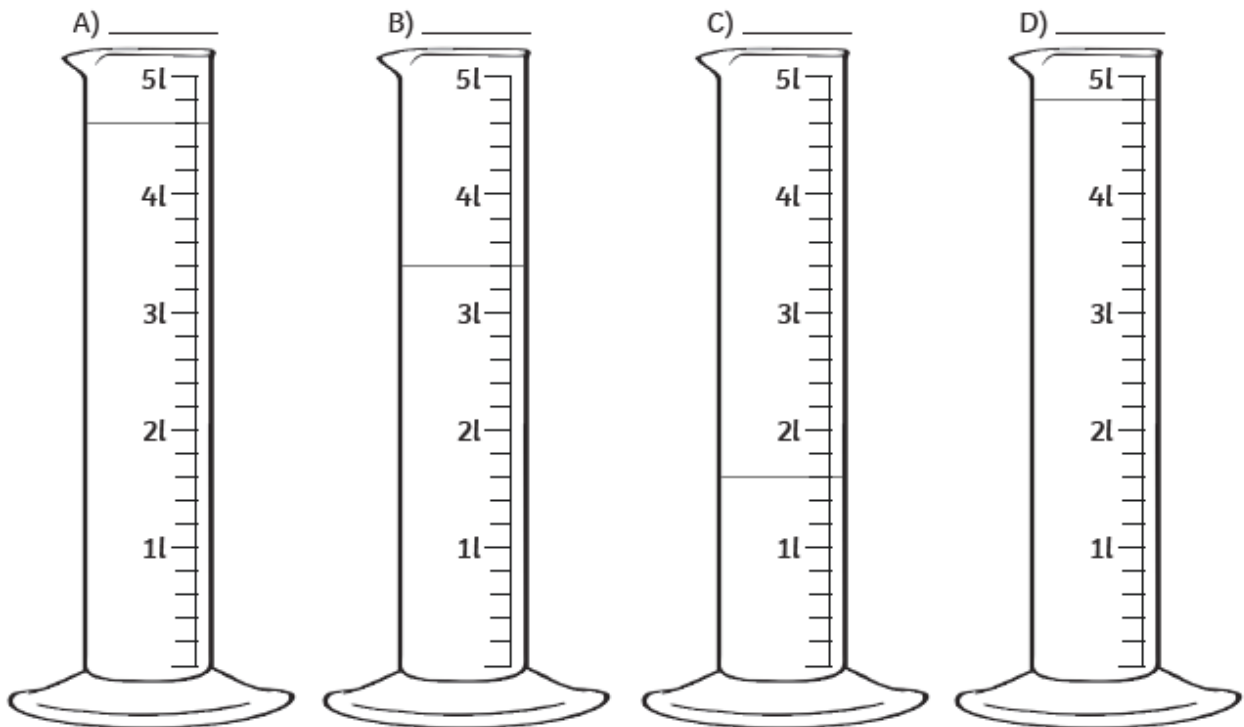

I can read scales to measure in litres and millilitres.

Write how much liquid is in each cylinder.

Cylinder 1:

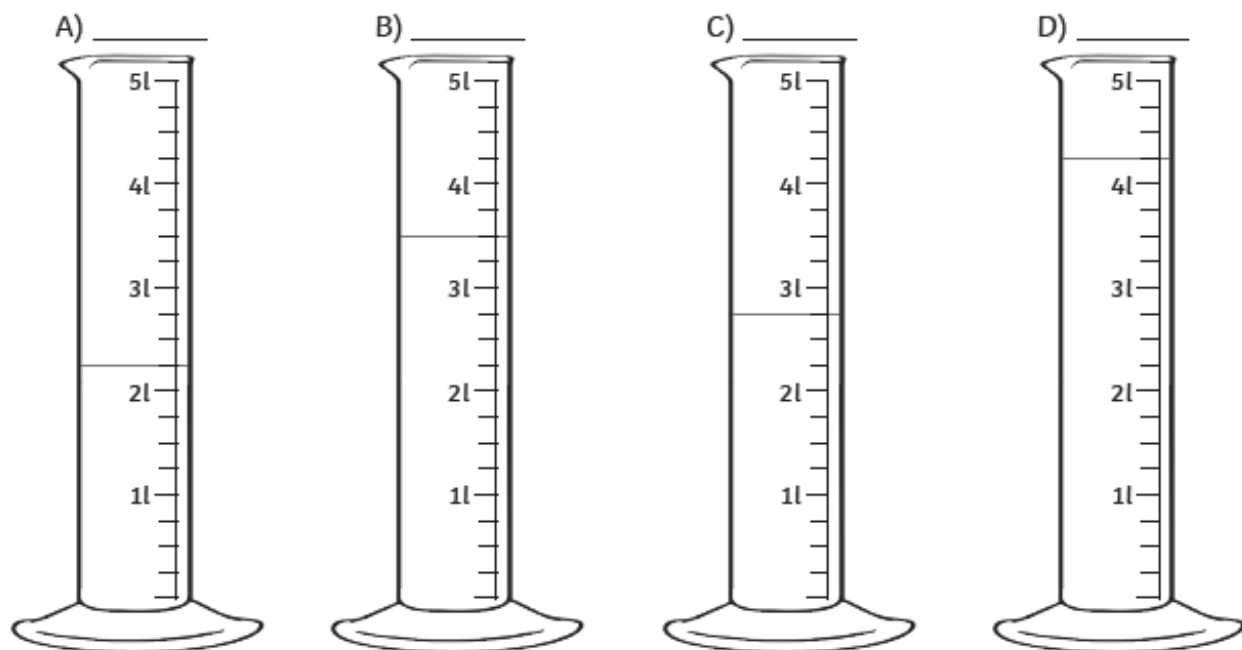

Explain how you know what each increment is worth.

Cylinder 2:

Explain how you know what each increment is worth.

2) Fill each cylinder to the amount shown:
