

## Google Classroom User Guide

- 1) Download the Google Classroom app/ type '*classroom.google.com*' into the URL bar, or open Google Chrome and click on the Google Apps icon (the dots in the top right of the screen).

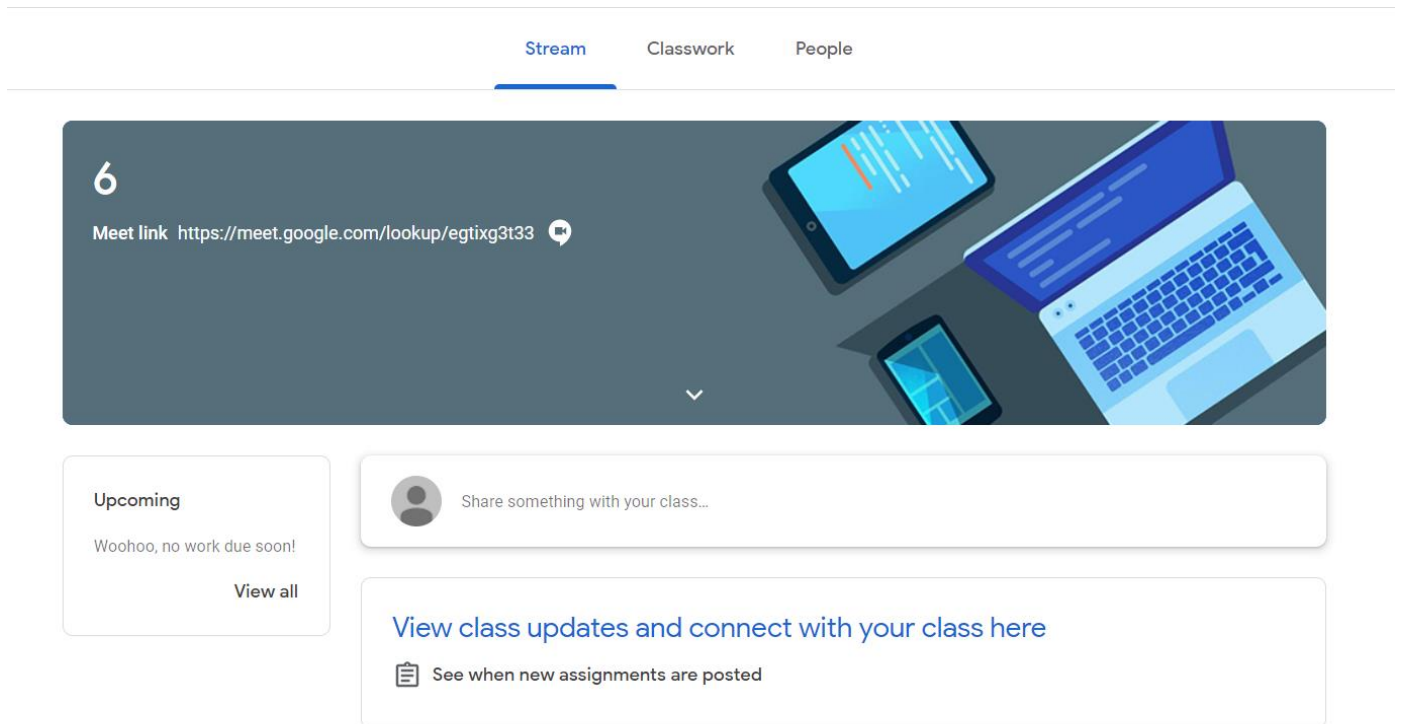

If opening through Google Chrome, select the Google Classroom icon or scroll down until it appears:

- 2) To log-in, you will now be prompted to enter your child's User name (e.g. [joe.bloggs@oak.education](mailto:joe.bloggs@oak.education)) and then their password.
- 3) After reading the terms and conditions, you will be prompted to select 'I am a Student' before joining their classroom.

This is an example of what a classroom looks like:

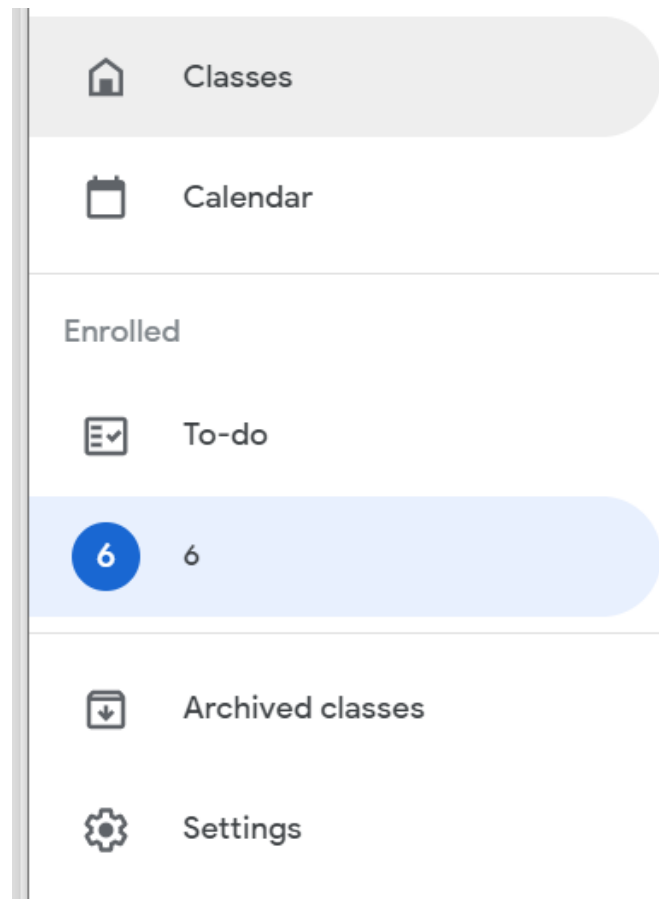

The **Streams** tab will show you a feed of comments, materials and tasks.

The **Classwork** tab will show each assignment that has been set by class teachers.

The **People** tab will just show you your classmates.

You have different drop down tabs to the left your screen and the '**To Do**' tab is a quick way of seeing what work is due.

We will support children in school to navigate their Google Classroom but there are also some very useful tutorials online, which you can watch on YouTube.
