Dear Parents/ Guardians

Now your child is in Year 1 they will receive regular maths and spelling homework to support their learning. Please see below for this term's homework:

## Spellings:

Year 1 Spellings					
13/09/21	20/09/21	27/09/21	04/10/21	11/10/21	18/10/21
Common exception words	Common exception words	Common exception words	Common exception words	Common exception words	Common exception words
the	we	she	no	by	was
you	he	be	so	my	is
your	me	said	go	why	his

Each week we ask that you support your child to learn to read and spell the common exception words above. Once they can read and spell the words from memory, encourage them to apply them in sentences. For example, can you write a sentence with the word 'you' in? Check that they understand what the words mean and that they know how to use them in the correct context.

				9 = 7 + 2	
				9 = 8 + 1	

Each week, we ask you to support your child with their number bonds. Number bonds are pairs of numbers added together to make another number. They help children to understand that a number such as 10 can be made by a range of different pairs such as 5+5 and 2+8. Knowing and understanding the relationship between number bond pairs can really support your child with the mental arithmetic involved in adding and subtracting. You can teach number bonds in a range of different ways. Please find some suggestions below:

- Make number cards - can your child find matching pairs?
- Play Bingo
- Use objects and split them into two groups. Can your child record (on paper/on a whiteboard/using chalk etc) all the different ways they find of splitting them.

- <https://www.ictgames.com/saveTheWhale/index.html> - an interactive game where you need to know your number bonds to save the whale. (You can adjust what number you are focusing on from 5-10).
- Play find the missing number-  $5+?= 10$ . What number helps 5 to make 10 etc.
- Build a tower using blocks - can your child find how many blocks are missing to make the total? For example, when learning number bonds to 8, you could build a tower of 5 blocks; how many more would they need to make 8? (Having one colour for bricks in the tower and another for the missing bricks could help to support your child to see the 2 numbers)

If you have any questions please don't hesitate to ask.

Kind Regards
