

## TOPIC

STEM – Science, Technology, Engineering and Maths. We are looking forward to being engineers this term, looking at different types of engineers, the things they build, and designing and making our own creations. We will then be investigating ways people celebrate Christmas.

## MATHS

In this term we will be investigating patterns – explaining the patterns we can see and creating our own. We will also be sorting and matching – looking for similarities and differences and deciding on our own criteria for sorting into groups. We will be talking about addition and subtraction.

## PERSONAL, SOCIAL AND EMOTIONAL DEVELOPMENT

Our focus this term is to look at being kind. We will look at the small things we can do which make a big difference. We will also talk about what we can do when we come across a difficult challenge – should we give up? Or should we try and learn and have another go?

## PHYSICAL DEVELOPMENT

To keep ourselves fit and healthy, we will be talking about how to stay safe in our environment – washing our hands and managing hygiene such as coughing and sneezing. We will be building up our stamina by completing lots of high-energy circuits and workouts!

## LITERACY

We are continuing to build up our knowledge of our letter sounds, using them with more confidence to read words and sentences. We are also learning how to start writing some simple sentences by linking words together. We are working hard to form our letters correctly, starting and ending in the right place.
