The Rounding Rap!

Find the place value and (circle) that digit.

Now move to the right and <u>underline</u> it.

<u>0 – 4</u>, circle stays the same

<u>5 to 9</u>, (adding one) is the game

Now flex your muscles like a hero

Digits to the <u>right</u> change to zero.

All other digits stay the same.

Yo! You're a winner in the rounding game!

$$4\ (5)\ \underline{6} \approx 4\ 6\ 0$$

+1
