# Reading Resource

With some of our children now learning at home, finding a book for them to read can become a problem, however as a school we have been using myOn - an online reading resource available both in class and at home. I would like to take this chance to explain how it works:

All children from Year 2 up have access to myOn 24 hours a day 7 days a week. They are able to read books and then take Accelerated Reading tests from the same site. They have used this in school and have logins.

Children logon using the following link: myon.co.uk/login/

Fill in the school with Roskear Primary School

Then fill in your child's username and password

This will take you to the dashboard, click on library tab and you will see a tab for recommended. This tab will have books in that are at each child's reading level, they can also choose books from the browse section, however these may be books at a higher or lower level than your child is reading at.

Once a book has been chosen your child can either read the book or have the book read to them and read along.

If your child cannot remember their username or password or you have any questions regarding this resource please get in touch with their online teacher using eSchools.
