

School closure work for Year 1 – Summer Term 1 (w/c 18th May 2020)

***Please make sure children are practising their phonics daily – Click on the link below or copy and paste it into the browser (To be completed daily). I have also included some fun alien word games this week!**

<https://www.ruthmiskin.com/en/find-out-more/parents/>

It will take you to Ruth Miskin's – Read Write Inc page. There are daily phonics lessons, poetry and stories every day. This is fantastic way for your child to practise their phonics. I suggest that all children re-cap the set 2 and set 3 phonics sounds.

English (2 tasks this week) - please see the video I have uploaded onto the school website

Children to read comprehension sheet and answer questions (see worksheets). Note: there are 3 different levels for the children to choose from. Some children may need guidance in order to choose questions that are challenging yet achievable for them.

Maths

Monday: Lesson 1 – Add and subtract 11 by adding/subtracting 10, then 1. Children rehearse how to add and subtract 11 to and from 2-digit numbers. *(Please discourage your child from adding/subtracting 11 by counting on/back in 1s). Instead use 'Spider' to add/subtract 10 on the 1-100 grid, then 'Fly' to add/subtract 1.*

Tuesday: Lesson 2 – Add and subtract 12 by adding/subtracting 10, then 2. Children revise adding and subtracting 12 using Spider and Fly. Children rehearse this on the practice sheets and consolidate by exploring solutions to the Mastery questions.

Wednesday: Lesson 3 – Compare weight by direct comparison. Children are comparing weight by direct comparison. For fun your child could make their own scales at home, using a bucket balance to help demonstrate how the heavier item goes down and the lighter object goes up. I look forward to seeing how resourceful you can be. Have fun!

*Please note, we have partially covered measuring in length and height in class before.

Therefore, Thursday and Friday's lessons are to be used as a re-cap and to consolidate their learning.

Thursday: Lesson 4 – Measure lengths using non-standard units. Children use non-standard uniform units such as cubes or Lego® bricks to measure the lengths of pieces of string.

Friday: Lesson 5 - Measure lengths and find a difference between them. Children measure pieces of ribbon using non-standard uniform units, then find the difference between their lengths. Encourage your child to have a go at the problem-solving investigation at the end.

Maths – everyday activities

Practise counting in 2s,5s and 10s daily and from 0-100 and back from 100-0.

Have fun dancing and singing along with our 'Super-movers' – daily maths workout – 2s, 5s and 10 times tables.

<https://www.bbc.co.uk/teach/supermovers/ks1-maths-collection/z6v4scw>

Spellings – see weekly spelling sheet attached (practise daily then test your child on Friday).

In class children self-mark and give themselves a score out of 10. If they get 9 or 10 they receive a sticker, however if you do not have stickers at home, maybe they could have an extra 5 minutes on their favourite game or a small treat, as a reward for their hard work.

Reading – (Read daily for 15 minutes either from own book or via Oxford Owl).

If you use Oxford Owl, create your own parent login - www.oxfordowl.co.uk

Find e-books...your child can read a number of age appropriate books, suitable for their reading ability. If they are too hard, go down to the age below. If too easy have a look at the books available in the next age group up. There are questions/suggestions for parents on the inside or back cover of each book. Your child will also be able to undertake a couple of activities on each book they read.

Topic-based activity – keep working on the topic you have chosen in your scrap-book.

Well done to you all, the topic scrapbooks are looking amazing!

* If you are having any trouble accessing Nessy, please could you let me know.

Keep safe and have fun learning,
Mrs Montesinos
