

Estimate the answer to the nearest 100.

1.  $696 - 273 =$

2.  $491 - 389 =$

3.  $592 - 179 =$

4.  $784 - 313 =$

5.  $651 - 306 =$

Estimate the answer by rounding to the nearest 10.

1.  $391 - 163 =$

2.  $747 - 112 =$

3.  $529 - 158 =$

4.  $447 - 236 =$

5.  $842 - 532 =$

Estimate the answer by rounding to the nearest 10.

1.  $732 - 524 =$

2.  $359 - 183 =$

3.  $658 - 212 =$

4.  $825 - 625 =$

5.  $673 - 363 =$

Show me how you could check whether  $482 - 284 = 200$  using another calculation

Always, sometimes, never

When you subtract, the number gets bigger.

Poppy has 176 football cards in her folder. She gives a handful to her friend Larry.

She estimates she has 100 football cards left in her folder. Is she correct? Explain your answer.
