

Estimate the answer to the nearest 100.

1. $696 + 213 =$

2. $421 + 389 =$

3. $512 + 199 =$

4. $789 + 398 =$

5. $301 + 102 =$

Estimate the answer by rounding to the nearest 10.

1. $311 + 267 =$

2. $452 + 112 =$

3. $529 + 322 =$

4. $145 + 139 =$

5. $842 + 123 =$

Estimate the answer by rounding to the nearest 10.

1. $267 + 113 =$

2. $389 + 123 =$

3. $456 + 232 =$

4. $687 + 211 =$

5. $878 + 344 =$

Show me how you could check whether $281 + 376 = 657$ using another calculation

Convince me that addition and subtraction are opposites

Bob has 89 bouncy balls in his drawer. He picks up a handful more to drop into his drawer.

He estimates he has 95 bouncy balls in his drawer now. Is he correct? Explain your answer.
