

# 96.1%

# ATTENDANCE

SEPTEMBER—JANUARY 2017 – 2018	SEPTEMBER—JANUARY 2018—2019
92.8%	96.1%

Team Sandbrook,

This is a great achievement compared to this time last year, so well done. We are now hovering just above the national target of 96%. Now it is time to work even harder and smash our school target of 97%!!

 Registration Class: \_\_\_\_\_ Current Cumulative Percentage: \_\_\_\_\_

WEEKLY ATTENDANCE PASSPORT

## PASSPORTS

Since we have returned from our Christmas break, I have sent out a few letters informing families that their child(ren) is on an attendance passport. This is because their attendance is below 94% but above the persistently absent threshold of 90%.

I am aware of course, that the majority of these children have been legitimately ill and some have even been sent home by school. However, our school policy is that any child who has a cumulative attendance percentage of between 90% - 94% must be provided with an attendance passport. I know that this may seem a little harsh to some, but this system is having such a positive impact on attendance as a whole, and we need your continued support with the scheme. The children do not mind being on it!

On the back of this letter I have attached the government's guidance for how long children need to remain absent from school for various illnesses.

## Weekly Attendance Trophy

Well done to The Learning Hub. You have had the best attendance so far this term. Keep this up!

# EXCLUSION TABLE

Infection	Exclusion Period	Comments
Athlete's Foot	None	This is not serious condition. Treatment is recommended.
Chicken Pox	Five days from the onset of rash and all the lesions have crusted over.
