

# Florence Nightingale

What were hospitals like before Florence started to change things?

They were poor and smelly.  
Rats were common and many  
men died.

Name two things that Florence and the nurses did to make things better at the hospital?

1. They cleaned the hospitals...
2. They served better food for the patients.

FLORENCE WAS :

- ① Amazing - she made the hospital better.
- ② Brave - it wasn't easy.

The corona hospitals are  
named after Florence  
Nightingale.
