If you would be interested or know of another parent who would benefit from this course please pass this leaflet on or contact Mrs
Gaye Massey

Testimonials from parents who attended our last course

The quality of teaching was very good and they shared a personal understanding of a lot of issues which was very helpful.

I found the course content very good, wise, good variety of issues covered, help and information on everyday issues.

Quality of teaching fantastic, respectful, warm and friendly, clear communication throughout. Have seen improvements in the areas I have used from the course and from the other parents helpful and useful tips and information.

Thank you for not judging me and for helping me change and connect with my kids.

Course content invaluable, seeing a problem doesn't mean I could fix it. I didn't have the tools. The course taught me not only how important play was, but also how to play to better connect. It also taught me that my behaviour was key. The less I yelled the less my kids yelled.

The course providers were understanding, sympathetic and knowledgeable on all aspects of the course material, they made it fun and informative. I could easily have read a book and done the activities on my own, but I would not have enjoyed it as much, there are also a lot of talking points that is needed and vital in order to really change your own behaviour

Without a doubt the best thing I have done for both myself and my kids.

I have been implementing all the things I have learnt and can see some positive changes.
