

# AFRICA

Dear Year 3,

We hope you are all keeping yourselves safe and enjoying some quality time with your families. Our Summer term theme should be Africa so we have put together some ideas so you can explore this theme at home with your families. We have attached any resources you may find useful.

You can:

- Paint or draw an African scenery.
- Research one of the Big Five (lion, elephant, buffalo, leopard or rhinoceros).
- Use your research to make a power point presentation.
- Or even write a non-chronological report.
- Learn about Jane Goodall (comprehension attached).
- On a sunny day, draw around the shadows of safari animal toys or cut-outs and colour them in.
- Locate Africa on a globe or map and research the different climates it has. Can you find pictures of examples of the different climates?
- Research one of the African countries (e.g. Egypt, Kenya, South Africa, Madagascar) and learn about its climate, population, language, wildlife and any other interesting facts.
- Research Nelson Mandela and his influence on Africa and the world (comprehension attached)
- How many different religions does Africa have? How many different languages are there? How many countries?
- Maths links - how many different currencies do they use? How does the population of Africa compare to the population of Europe? Can you design an African pattern using a variety of 2D shapes? Can you collect data about African animals? (worksheet attached)
- Check out the Edinburgh Zoo website to see live webcam feeds of various animals at their zoo.
- Watch the Lion King (both old and new versions) - just because it's one of Mrs Dawson's favourite movies!

We miss you all so much and can't wait until we can all be together in school again. Keep yourselves and your families safe.

Mrs Dawson & Miss Worthington
