

Alternative Provider Testimonial – September 2019

Dear Elisa and Philippa,

Being on the outside looking in I thought it would be useful to share my experience of working with the 'new' look GFAPS.

I have to say I'm really impressed, there has been a significant improvement in moral. The centres are clearly running much much better in the teaching areas with timely, effective and efficient briefings taking place. So far the behaviour and attitude of the Students appears improved - despite term just starting.

I believe these very positive and numerable improvements are as a result of hard, brave and dedicated work. I also believe that this has been led by both of you - I know others are involved but I have little contact with them - even so you are the drivers of this change and the hard working engine behind the improvements.

So I'd like to say Well done, great work!

Yours Seb
