

# BRILLIANT BODY GUIDE

This is not only for valuable biology revision, but also a chance to stretch your writing muscles – and perhaps your arty muscles too!

- As always, I will expect your presentation to be of an **extremely high standard**. Be the best that you can be!
- A more creative approach could boost your score, **but only if there is sufficient information and if your SPAG is accurate!**

## When things go wrong

Bumps, breaks and bruises, etc. How does the body manage to repair itself? What are common illnesses experienced by children?

Extra bits: Do you know any medical myths? (E.g. Being cold gives you a cold.)
