

Wild Space Play Club Year 2 Autumn 2018

Resilience: when your socks get wet and it's cold.

Managing risk. Using tools safely, following rules.

Some of us used a saw to cut a wooden disc. It was very tricky. We used a palm drill to make a hole in the disc so we could hang it on some string then decorated it with pens.

Make observations about the natural world.

We found an amazing spider. We looked it up in a book because we wanted to know what kind it was. It is called a 'Garden Spider'. We used a magnifier to look closely - it had amazing patterns.
