

# Wild Space Play Club Year 2 Autumn 2018

A campfire gives light and warmth. It can be used to cook / warm foods and gives a psychological sense of security. Taking part in building and maintaining a campfire requires an understanding of the risks involved and the strict rules that must be adhered to.

This week we all had a go at lighting a fire using a 'fire steel'. It was really tricky. The fire steel hurts your fingers because you have to push really hard to get a spark. You have to keep on trying even though it's hard and not give up. Some of us remembered that we needed to think..."I can't do it YET'. We all managed to light a fire in the end. .
