

## COVID-19 Catch-Up Funding Report 2020-2021

The government announced £1 billion of funding to support children and young people to catch up lost time after school closure. This is especially important for the most vulnerable and disadvantaged backgrounds.

Schools should use this funding for specific activities to support their pupils to catch up for lost teaching over the previous months, in line with the curriculum expectations for the next academic year in [actions for schools during the coronavirus outbreak](#).

Number of pupils on roll	265
Total number of students eligible for Catch-Up Funding	238
Total amount of funding received	£19,040

### Priorities identified following the full return to school:

Children and young people across the country have experienced unprecedented disruption to their education as a result of coronavirus (COVID-19). Those from the most vulnerable and disadvantaged backgrounds are among those hardest hit. The aggregate impact of lost time in education is substantial, and we need to ensure that children and young people recover and get back on track. DfE (October 2020)

Our priorities will be:

- To ensure that our children return to normal educational routines as quickly as possible, are supported by high quality teaching to recover and get back on track with their learning.
- To ensure that our disadvantaged and vulnerable groups receive targeted support to catch up and reduce the attainment gap between them and their peers.
- To raise the attainment of all pupils to close the gap created by COVID-19 school closures.
- To improve interventions in maths, to supplement the additional support we already provide in English.

In planning this strategy, we have combined professional knowledge with robust evidence about approaches that are known to be effective, including reference to:
