

ART 3

WALT – make sketches using detail and shading

Hopefully your mini beast hotels will have some residents by now!

I would like you to go and observe what you can see. Take a magnifying glass if you have one.

Using a pencil I would like you to have a go at sketching one or more of the insects you can find.

Make sure you include lots of detail.

Have a go at putting different pressure on your pencil to make it lighter and darker.

You could also try cross hatching.

If you have no bugs try sketching one of these.
