Instructions

You **may not** use a calculator to answer any questions in this test.

Questions and answers

You have **20 minutes** to complete this test.

Work as quickly and as carefully as you can.

Put your answer in the box for each question.

A grid of 10 columns and 4 rows. In the center of the grid, there is a larger empty rectangular box with a thick black border, intended for writing an answer.

If you cannot do one of the questions, **go on to the next one**.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

Marks

The number under each box at the side of the page tells you the maximum number of marks for each question.

1

$$125 + 271 =$$

A large grid of 20 columns and 10 rows, intended for students to show their working out for the addition problem.

1 mark

2

$$100 - \boxed{} = 30$$

A large grid of 20 columns and 10 rows, intended for students to show their working out for the subtraction problem.

1 mark

3

$$72 \div 8 =$$

A large grid of 20 columns and 10 rows, intended for students to show their working for the division problem.

1 mark

4

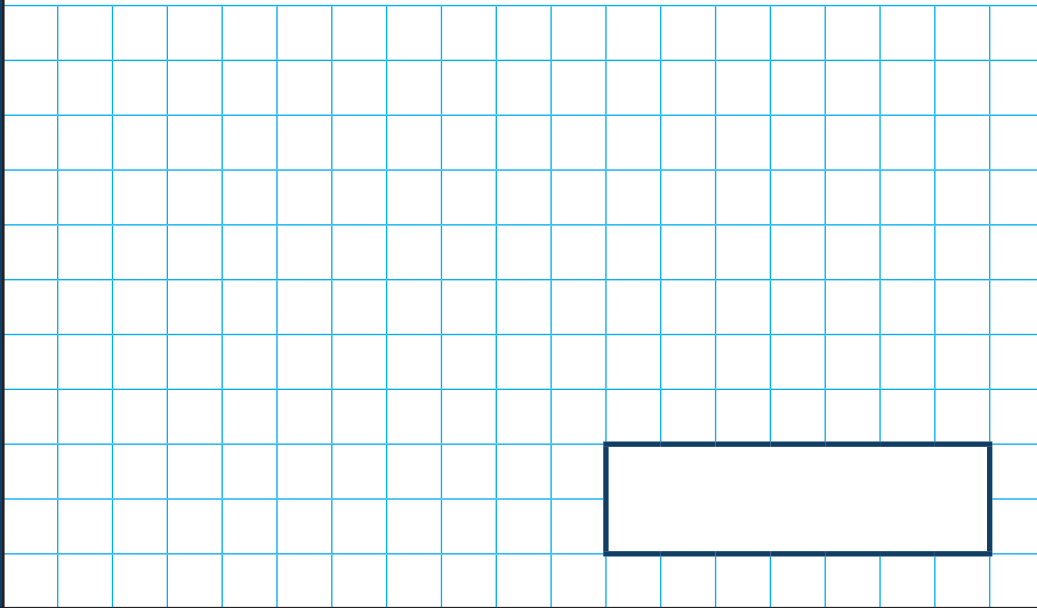

$$\boxed{} = 4,650 - 1,000$$

A large grid of 20 columns and 10 rows, intended for students to show their working for the subtraction problem.

1 mark

5

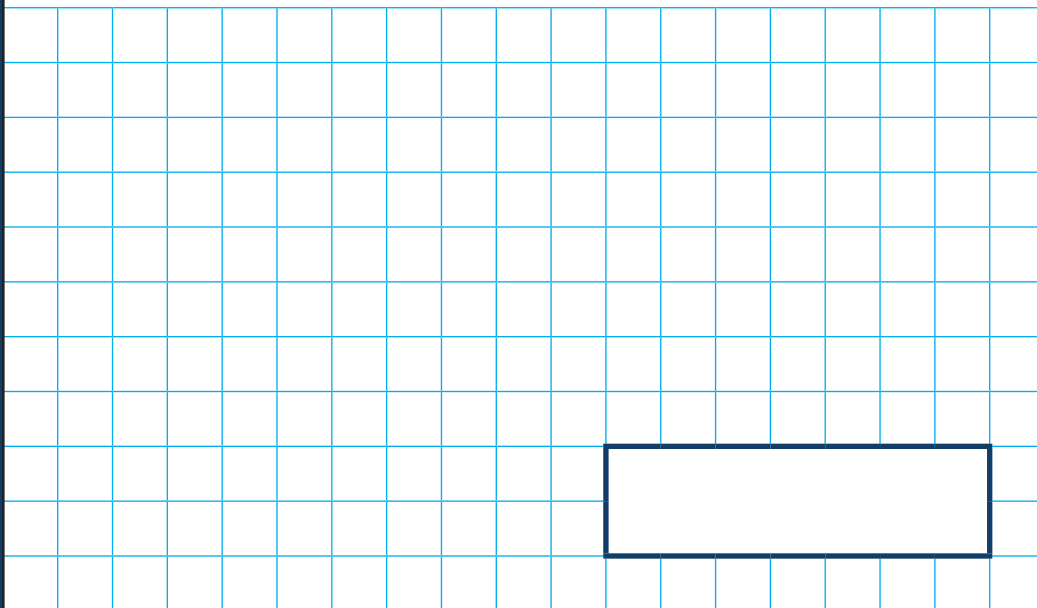

$$\frac{4}{7} + \frac{2}{7} =$$

1 mark

6

$$4^2 =$$

1 mark

7

$$42 \times 6 =$$

1 mark

8

$$\boxed{} \times \text{£}168 = \text{£}1,680$$

1 mark

9

$$18,072 + 3,928 =$$

A large grid of 20 columns and 15 rows for working out the addition problem. A rectangular box is drawn in the bottom right corner of the grid, spanning 10 columns and 3 rows, intended for the final answer.

1 mark

10

$$6 \times 8 = \boxed{} \times 4$$

A large grid of 20 columns and 15 rows for working out the multiplication problem. A rectangular box is drawn in the top left corner of the grid, spanning 10 columns and 3 rows, intended for the final answer.

1 mark
