

+ and -

$$\begin{array}{r} 3707 \\ + 4795 \\ \hline \hline \end{array}$$

Place Value

What is one thousand less than 6035

× and ÷

$$2 \times 7 \times 3 =$$

$$46 \div 5 =$$

Problem Solving

Here is a trapezium. How many angles are obtuse?

Reasoning

If I count 10 steps backwards from six, I will get to -3.

Is Alana correct?

Explain your reasoning.
