

Early Years Foundation Stage
Curriculum Overview
Summer Term 2019

This term we will be finding out all about Minibeasts. We will be growing butterflies and frogs in the classroom, going on minibeast hunts and finding out facts. The children will be writing their own captions to accompany their paintings and designing and making their own minibeast homes. This will include doing lots of work to our garden, planting things that will encourage wildlife to visit the garden and help it flourish and grow. We are also making our own pond complete with bog planting and shady plants - hopefully we will encourage frogs to visit our garden so that next year we might have frogspawn from the very earliest stages.

After half term there are lots of busy times ahead that need quite a lot of preparation. We will be having sports week to fit in with the annual Sports Day events, a cafe week to herald the beginning of the transition calendar and of course Mazey week where we will be revisiting our minibeast theme and making costumes and props for the parades. We are planning a mini topic on Supertato - a super hero with a difference. We will be helping him to solve crimes from a series of clues, making wanted posters, traps to catch the Evil Pea, making our own superhero vegetables, looking at healthy food choices and much, much more. Our topic will end in our annual EYFS Camp on the school field where the children will take part in lots of planned activities and receive their own superhero medal that they will have made from clay. Busy, busy.....
