

CRACKING TIMES TABLES

From Key Stage 1 children will be taught multiplication tables and corresponding division facts eg if $2 \times 6 = 12$ then $12 \div 6 = 2$ or $12 \div 2 = 6$.

The order of the times tables for each level in the Cracking Times Tables programme is as follows (The children only have three minutes to answer the questions no matter which level they are on to ensure they have quick recall of the facts):

Level Times Tables	Tested	No. of questions
1	2	10
2	2, 10	15
3	2, 10, 5	20
4	2, 10, 5, 4	25
5	5 2, 10, 5, 4, 8	30
6	2, 10, 5, 4, 8, 3	35
7	2, 10, 5, 4, 8, 3, 6	40
8	2, 10, 5, 4, 8, 3, 6, 9	45
9	2, 10, 5, 4, 8, 3, 6, 9, 7	50
10	2, 10, 5, 4, 8, 3, 6, 9, 7	100
11	All above & division	40
12	All above & division	60
13	All above & squares and roots	40
14	As above	50
15	All tables up to 12x	50
16	All tables up to 13x	60
17	All tables up to 14x	70
18	All tables up to 15x	80
19	All tables up to 16x	90
20	All tables up to 17x	100

Please note: The order for the times tables in the Cracking Times Tables programme is not numerical order so as to encourage the children to look for patterns e.g. Double the 4 x table = 8 x table Double the 3 x table = 6 x table
