

Rocks to Romans

This term, Year 4 will be travelling through time to discover about the Stone Age and the Romans. By using Dr Who's Tardis, no stone will be left unturned as we learn about these Rocking Rolling times!

Art

We will be creating our own Roman mosaics! What kind of patterns did the Romans use? Did any mosaics make pictures? Why are mosaics an important part of history?

Science

We will be looking at states of matter. What happens when chocolate is left out in the sun? What happens if I put my bottle of water in the freezer? What happens to puddles on a sunny day?

Literacy

We are continuing to practise our writing skills, including reports, persuasion texts and information booklets helping us with International Fortnight.

PE

Some of us are swimming this term! Some other children are working on health and fitness. This will involve circuit training and what makes a balanced diet.

Maths

We will be continuing to develop as mathematicians. We will be exploring more topics in maths such as fractions and decimals.

History

Year 4 will be studying the Stone Age and the Romans to discover how people lived in these times. We will be imagining what it might have been like as a child in these times.

We will have a chance to visit a Roman Villa as well.

DT

We will be creating our own Roman bullas. This will require us to learn and practise sewing skills. We will also find out what the Romans used them for.

Computing

We will be looking at coding and HTML editors. What makes up a website? What is the difference between the World Wide Web and the Internet?

Geography

We will be practising our atlas skills and looking at maps from Roman times!
