

Foundation 2 Homework 12.7.19

On Monday we had a fantastic trip to The Magical Circus. We watched real circus performers, practised juggling, plate spinning and stilt walking, learnt about the history of the circus and showed off our newly acquired skills in a performance at the end of the day.

In maths we have been recapping some of the skills we have learnt throughout the year, particularly doubling, halving and sharing.

In literacy we have written recounts of our trips to the circus using the words- *first, next, then, after that* and *finally*.

We have also taken part in football and dance sessions with the sports coaches from Full of Beans.

The hedgehog sculpture has now been installed at the Williamson Art Gallery alongside many other pieces of art produced by Wirral school children. If you get the chance, the Coast to Country exhibition is running until September and is well worth a visit.

Activities

- **Read your book on Active Learn. Please can you return any home practice reader books that you still have by the end of next week.**
- **Can you tell your grown up something you learnt about the history of the circus.**

Mrs Bancroft and Mrs Lucan
