

St Bernadette's School Council
Newsletter Autumn 2018 Issue 1

Each term our School Council, comprising of two representatives from each year group (Y1-Y6), come together over a series meetings to discuss and plan ways to improve our school. Each representative brings to our meetings the ideas and petitions of their classmates for the Council to consider. One of the first actions of this year's Council was to agree to the publication of a termly newsletter to inform the school community on the progress of our School Council.

The Council has also agreed to, and implemented, a suggestion box scheme, placing such boxes into each class to further enhance the voice of our school pupils. Each meeting will begin with assessing and considering suggestions.

We are also proud to announce that we aim to become a Global School and School Council representatives will be visiting a leading school in this field, in the spring term, to research what such entails and report back to the school.

With a mind to helping to save the planet, we have begun to encourage recycling in every class room as our pupils are very aware of the amount of paper that is otherwise thrown away in the school environment. Paper/card and plastic recycling containers will be present in each classroom from January.
