

## **What Are We Learning In Class?**

### **English**

This week, we will be thinking about creating our own stories set in a historical setting that has the title The Peasant, the Coins and the Roman Guard. We will work in groups to think about different ideas for the story. The children will then plan their own story using this title and then verbally tell it to different people.

#### ***How can you help at home?***

*Read some stories set in different times in history.*

*Research different Romans or Celts that lived in Roman Britain that they could include in their story.*

### **Maths**

We will be subtracting fractions with the same denominator.

We will then look at finding equivalent fractions using fraction walls and then look at how to find equivalent fractions without a fraction wall.

#### ***How can you help at home?***

*Get your child to teach you how to subtract fractions with the same denominator. Can they explain how to find equivalent fractions?*
