

Sycamore & Willow Class

Home learning project menu : Autumn Term 1, 2021

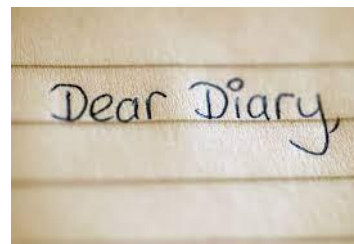

Find out about 2 different inventions created during the Industrial Revolution.

Make a presentation about them - you could create labelled diagrams, descriptions of them. Tell us who invented them and why.

Describe how you would feel if you were living during the Industrial Revolution.

Write a diary.

Create a factfile or map where were the different industrial towns? What can you learn about them?

Think - What 5 questions would you ask a factory owner? Explain why.

Create a newspaper report.

Create a timeline to show some of the fantastic developments and inventions during the Industrial Revolution.

Make a model - of factory worker housing, a model of a factory or an industrial town.

Imagine you are a worker escaping to the seaside for the day. Plan and record your holiday (day!) at the seaside.

Innovate: What would you invent and why? Show me and tell me all about your invention.

Projects should be completed **by Friday 15th October**. Please bring in your project or submit your project using the class email address when it is finished. Thank you.
