

Community Newsletter 2019-20

Dear Parents and Carers,

We hope that you all continue to keep well and that you were able to make the best of the weather over what was a very unusual spring break.

It goes without saying that we miss seeing all the children and families at school. Last week we were informed that the lock down was extended for three weeks. At Seaford Primary, we are committed to continuing to support you all at this time. Our online learning tab continues to be updated with work that you can access for the children at home and is ready each Friday, so that tasks can be gradually downloaded over the weekend. Please continue to refer to the keep in touch letter from your child's class teacher which provides you with guidance about the activities each week. We have enjoyed receiving emails showing the range of activities the children have been completing. We have seen some spectacular bike riding skills and stunts and wonderful art work too. Hearing from the children certainly cheers us up and is a lovely way of keeping in touch with them at this time. We continue to reinforce our message that the routine you have established in your home is going to be best for you; striking a balance between learning, the children having the opportunity to get outside and enjoy their daily exercise as well as time to play is essential.

Since our closure, we have been contacting families via phone or email. Of course, there are many members of our school community and we need to make sure we adhere to all our usual confidentiality and privacy procedures as we make contact. If we haven't contacted you yet, we will. Please bear with us-the welfare of the children and our families is our priority. This period of time is worrying and has presented significant challenges for us all. Please be reassured that we are here for you. A member of the leadership team are in school each day; if you need to contact us at any time please do using the usual school phone number.

Each week we receive updates about online safety. As we have mentioned before, there is extensive guidance about online safety on our school website on the online safety tab. A new document has been added this week and focuses on the safety measures around the use of Netflix at home for you to refer to. We would also like to remind you about the White Rose maths lessons which have been updated over the Easter break. These are a very useful resource for mathematical learning. Each lesson is narrated to the children and includes the types of models and images we would use in lessons to help the children understand mathematical concepts. The website link for this resource is included on the bottom of this letter.

Rainbows adorn houses around our locality and also our school gates. As a school, we continue to extend our gratitude to all those in our community who continue to work so incredibly hard to look after us all in the effort to overcome this pandemic. A new rainbow has now been attached to our school gates to help us show our appreciation and we would like to thank the children of our critical workers and our staff who put it together on behalf of our school.

Please continue to stay safe at this time.

Kind regards,

Seaford Primary School Senior Leadership Team

What parents need to know about **NETFLIX**

18+
The minimum age for Netflix is 18 for adults

Launched in 1997, Netflix is now one of the world's leading online streaming services, providing users with unlimited access to a huge selection of TV shows and films. It's available on any internet-connected device that supports the Netflix app, from smart TVs and games consoles to tablets and smartphones, and is becoming increasingly popular with a younger audience. This is unsurprising given consumer attitudes are changing more towards video-on-demand (VOD) services. That's why we've created this guide to help parents and carers understand exactly what Netflix is about.

Inappropriate content

Netflix hosts and produces content for all ages. It has a wide variety of films and TV programmes for young children, teens and adults and its extensive catalogue can provide hours of entertainment. Children can search for almost anything that if they share the same account as an adult, it can also open them up to viewing material that is adult-themed or inappropriate. Netflix doesn't check who's watching so children could access films or TV shows that contain violence, nudity or foul language.

Risk of hacking

With millions of users in over 190 countries, Netflix is often targeted by hackers and phishing scams which try to illicit usernames and passwords to gain access to accounts. If successful, hackers can steal payment details or try to sell your data on the dark web, providing others with the opportunity to profit. Given Netflix doesn't provide 2 factor authentication, it's important to ensure your login details remain secure.

Binge-watching

With the ability to access Netflix on almost any device, it can be easy to fall into 'binge-watching' TV series, with users finding it difficult to turn it off without knowing what happens next. The autoplay function also means that the next episode usually plays within seconds of the last ending and the Netflix algorithms mean that recommended programmes are very often similar to those you've just watched. This can easily lead to spending hours in front of the TV through the day or staying up through the night, potentially affecting sleep, mood and the ability to concentrate the next day.

Screen addiction

In addition to binge-watching, the fact that Netflix is available on almost any device with an internet connection means that parents may find it difficult to prize children away from a screen. With a huge collection of children's TV programmes and their latest film titles, children could start watching on the TV, continue on the tablet and finish on their games console. Increased screen time means that they may spend less time learning, playing outside, feel difficult to sleep or communicate less with family and friends.

Netflix party

Netflix Party is a free extension on Google Chrome that gives users the ability to watch a film or TV show online simultaneously with friends or family in different locations. It also provides the ability to chat to each other during the stream. Users can create a party and send a link to people they want to invite however the link can be copied and distributed further, meaning children could potentially be open to a group chat with people they don't know. It should be noted that Netflix Party isn't an official Netflix product and needs to be downloaded separately to the app.

NOS National Online Safety

This document can be found on the Online Safety tab and the Home Learning tab on the School website.
