

Planning

We have been learning all about rainbows and we have learnt lots about them. You read an explanation text all about rainbows. An explanation text explains the causes of things and gives us facts about a topic. How has the explanation text been organised? What else did you see included with the text? Did you notice any fun facts?

Most explanation texts have:

- A title
- An opening sentence that explains what the text is about
- Facts explaining how and why something happens
- Diagrams/ Pictures
- Fascinating facts

Read the explanation text about rainbows again (you can use the comprehension text from yesterday,) and see if you can find each of the features above. Tick the boxes when you have found these.

Now you are going to create a plan that you can use to help you write your own explanation leaflet all about rainbows.

Use this planning table to help you. Remember to only write key words, short sentences, or notes in your plan.

Title of text	
Opening sentence	
First set of facts	
Second set of facts	
Third set of facts	
Fascinating facts
