

Y3 Week 7 French

Months of the year (les mois de l'année)

1/ Learn the months of the year by listening to this video. Repeat each month as many times as needed. I am not expecting you to know them all for this week as we will revise them the following week.

<https://www.youtube.com/watch?v=xymHPRIM13M>

2/ Revisit the months of the year using questions and answers by following the powerpoint. When you open the powerpoint, make sure you click on "slide show" in the menu and "from beginning" so that you can have each slide on the big screen and more importantly listen to the French words! Use the arrow at the bottom left of each slide to get to the next slide and don't forget to click on  every time you see it so you can hear the sentences in French and repeat each time. C'est quel mois? (Which month is it?) C'est janvier. (It is January.)
Like the days of the week, there are no capital letters for the months of the year in French unless it is a title!

3/ Cut up the picture cards and colour them in. (see folder called "picture cards months")
Which month do you think each picture belongs to? Write the correct French month word under the picture correctly spelt (use the powerpoint to help you) and remember no capital letters! Then put the months in order to make "**une année**" (a year) and arrange them nicely by sticking them on a piece of paper.

Enjoy your French and stay safe!
