

# SCIENCE

From the beginning of time people have asked questions about their surroundings. They have tried to answer the questions through observations, research and investigation; hoping to find answers that will stand the test of time.

Scientific enquiry is a bed rock of Science. This week we will look at statements and pictures which will stimulate questions and allow children to develop their observational and reasoning skills.

Below you will find three questions which can be used for the development of scientific enquiry.

- Odd One Out (OOO)
- Positive Minus Interesting (PMI)
- Big Question (BQ)

## Additional Activities

Bored? Become a Scientist! Click [Here](#). Try out some of these amazing science experiments. Remember you must ask an adult first.

Click [Here](#) to meet a scientist!

Guardian & child discussion resource. Click [Here](#), then click on **PICTURES FOR TALK IN SCIENCE**. Read the instructions. Then use the resource to stimulate scientific discussion.

## Odd One Out

## Positive Minus Interesting (PMI)

Note as many positive, negative and interesting observations or ideas about ....

Plants can walk.

## Big Question (BQ)

Is a tree alive?
