

Premier House, Edgware | Fire safety situation report

Update 30 September 2020

As mentioned in our last update, the Government has confirmed they will be contributing towards the cladding replacement works required at the building however exploratory works are first required to ascertain final designs and costings involved - all of which need to be submitted to the Greater London Authority. The managing agents have stated they anticipate the relevant details will be submitted before the end of the year and are hopeful the cladding replacement works will commence early next year.
