**Figure S1** BtCaBP1 (A) and BtCaBP2 (B) expression in *Bemisia tabaci* after treatment with LC$_{50}$ doses of cyantraniliprole and imidacloprid for different time periods. Data are the mean ± SD for three independent replicates. The bars with different lowercase letters are significantly different according to one-way ANOVA, followed by Tukey’s multiple comparison test ($P < 0.05$).
