Figure S1. Cyclic voltammograms of O₂ reduction in [(MeOEt)₂NH][AcOH] on (a) GC, (b) Au and (c) Pt electrodes, respectively. Scan rate 0.1 V s⁻¹
Figure S2. Cyclic voltammetry obtained at different temperatures for O$_2$ reduction at a Pt microelectrode at scan rate 0.05 V s$^{-1}$ in (a) EAN and (b) [(MeOEt)$_2$NH][C$_6$H$_5$COOH].
Figure S3. Plot of current densities vs temperature for \( \text{O}_2 \) reduction at a Pt microelectrode at scan rate 0.05 V s\(^{-1} \) in [(MeOEt)_2NH][OSA], EAN and [(MeOEt)_2NH][C\(_6\)H\(_5\)COOH].
