for the paper

Multifunctionality of Crystalline M1 MoV(TeNb)
Oxide Catalysts in Selective Oxidation of Propane
and Benzyl Alcohol

Figure S1. Results of the Rietveld refinement of the powder XRD data for catalyst I-a.
Figure S2. Results of the Rietveld refinement of the powder XRD data for catalyst I-b.
Figure S3. Results of the Rietveld refinement of the powder XRD data for catalyst II.
Figure S4. Results of the Rietveld refinement of the powder XRD data for catalyst III.
Figure S5. XRD patterns of catalyst III before and after propane oxidation. Note that the reflections at around 35° are due to the contamination of silicon carbide used as a diluent in the catalytic test.
