

## Supporting Information

Elevated Fe(II) and dissolved Fe in hypoxic shelf waters off Oregon and Washington: an enhanced source of iron to coastal upwelling regimes.

Maeve C. Lohan and Kenneth W. Bruland.

Supporting information contains one table and one page.

Table S1. The low oxygen concentrations from the SEABird SBE 23 electrode and the discrete Winkler method used to check the calibration of the SBE just after our cruise ended. This data was kindly provided by Carl Issacson and Brian Popp.

SBE O <sub>2</sub> (μmol/kg)	Winkler O <sub>2</sub> (μmol/kg)
7.93	7.92
7.93	8.08
16.3	16.4
34.59	38.13
51.09	57.94
