Mesitylgold(I) and silver(I) perfluorocarboxylates as precursors of supramolecular Au/Ag systems.

Eduardo J. Fernández§*, Antonio Laguna‡*, José M. López-de-Luzuriaga§, M. Montiel§, M. Elena Olmos§, Javier Pérez§ and Raquel C. Puelles§

Supplementary Material
Figure S1. Crystal structure of complex 3 viewed down the crystallographic $z$ axis. Fluorine and hydrogen atoms have been omitted for clarity reasons.
Figure S2. Crystal structure of complex 4 viewed down the crystallographic x axis. Fluorine and hydrogen atoms have been omitted for clarity reasons.
**Figure S3.** Crystal structure of complex 6 viewed down the crystallographic y axis. Fluorine and hydrogen atoms have been omitted for clarity reasons.
Figure S4. Crystal structure of complex 7 viewed down the crystallographic y axis. Fluorine and hydrogen atoms have been omitted for clarity reasons.
