

Supplemental materials

1. Supplemental Table 1. Predicted cumulative costs in total and by type (intervention cost versus medical expenditure) in the intensive lifestyle intervention and diabetes support and education groups during the 9-year study period, in 2012 US dollar, and costs were discounted 3% annually.
2. Supplemental Figure 1. Predicted cumulative quality adjusted life years (QALY) by utility measurement (Hui-2 (panel A), Hui-3 (panel B), SF6D (panel C), feeling thermometer (panel D)), and cumulative total cost (panel E) in the intensive lifestyle intervention and diabetes support and education groups during the 9-year study period. Both QALYs and costs were discounted 3% annually.
