My hearing

Here you can see your audiograms. The blue line shows your left ear hearing and the red line shows your right ear hearing. There is also a black line which shows the average hearing level for people of your age.

All sounds and letters in the yellow 'talking-banana', which are above your audiogram lines are difficult for you to hear. You can test out the sounds and letters by clicking the different images and letters above and below your audiogram. They will give you a sound experience of how much your hearing aids help you, if you listen to the sounds both with and without your hearing aids. This knowledge can also be used to let others know about your specific hearing loss. If you want to know more, please watch this video:

Here you have the sound of a car in different audio configurations. Listen to the sounds and choose the sound you prefer by clicking the light green button. If you wish to modulate the sounds, use the sliders.

- Car soft: Play soft sound
- Car harsh: Play harsh sound

The first time you use My personal hearing coach you will need to specify how much time you want to spend training during a week. Choose the solution you prefer by clicking one of the buttons below.

- Beginners (tips & tricks and mentor)
- Intermediate (beginners + task)
- Advanced (intermediate + audiology and communication strategies)

Tasks - level of satisfaction with hearing aids questionnaire

Try listening to the different sounds surrounding you throughout the day. Find out if the tonal balance is fitting. Remember that the sounds will be experienced differently with your hearing aids, than without them. How would you generally describe the sound quality of your hearing aids?

- Pleasant
- Too harsh, metallic, too light tones
- Too muted, toneless, too dark tones
- Echo

Comments...
Your audiologist recommend that you read the book below to learn more about hearing loss.
