

Supplemental Material S1. Correlations between cognitive scores at Epidemiology of Hearing Loss Study 4.

	TMTA	TMTB	DSST	AVLT	VFT	MMSE
TMTA	-	-	-	-	-	-
TMTB	.65	-	-	-	-	-
DSST	.66	.67	-	-	-	-
AVLT	.36	.42	.48	-	-	-
VFT	.36	.41	.46	.36	-	-
MMSE	.61	.50	.53	.46	.38	-

Note. TMT = Trail-making Test; DSST = Digit Symbol Substitution Test; AVLT = Auditory Verbal Learning Test; VFT = Verbal Fluency Test; MMSE = Mini-Mental-State Examination. Pearson correlations, TMTA and TMTB were reversed so that higher values reflect better performance for all scores. All $p < .0001$.
