

Supplemental Material S8. Effects of therapy group and voice rest on humming.

Simple effect	OR (95% CI)	<i>p</i> value
Simple effects within Group × Time interaction		
<i>Effects of therapy group at each timepoint</i>		
Baseline		
Counseling vs. Therapy	0.782 (0.111-5.533)	.9513
Therapy vs. Evaluation	> 999,999 (0.015-> 999,999)	.0087*
Counseling vs. Evaluation	> 999,999 (0.012-> 999,999)	.0052*
Voice rest		
Counseling vs. Therapy	2.332 (0.061-88.960)	.9976
Therapy vs. Evaluation	> 999,999 (< 0.001-> 999,999)	.3326
Counseling vs. Evaluation	> 999,999 (< 0.001-> 999,999)	.3251
<i>Effect of voice rest within each therapy group</i>		
Therapy: Voice rest vs. Baseline	<. 001 (< .001-< .001)	< .0001*
Counseling: Voice rest vs. Baseline	< .001 (< .001-< .001)	< .0001*
Evaluation: Voice rest vs. Baseline	0.045 (0.004-0.544)	< .0001*

*Adjusted *p* < .05 for simple effects of Group and Time within significant Group × Time interaction in mixed model for humming after Tukey adjustments for multiple comparisons.
